Global Findex

Global Findex Database

What is the Global Findex?
The Global Findex database provides in-depth data on how individuals save, borrow, make payments, and manage risks. It is the world's most comprehensive database on financial inclusion that consistently measures people's use of financial services across countries and over time. The 2014 Global Findex consists of over 100 indicators, also shown by gender, income, and age. Collected in partnership with the Gallup World Poll and funded by the Bill & Melinda Gates Foundation, the Global Findex is based on interviews with about 150,000 nationally representative and randomly selected adults (age 15+) in over 140 countries.
