TOBACCO SURVEYS IN TURKEY

April 21 – 23, 2014

Ankara, Turkey
Outline

• Background: Tobacco based/relevant surveys (GATS&HIS)
• GATS&HIS
  – Content
  – Methodology (sampling method and distribution, response and non-response rate)
  – (Pre)field application and quality control
  – Data analysis and publication
• Basic indicators of GATS and HIS
• Future plans
## Background: Tobacco based/relevant surveys

### GATS
- GATS 2008
- GATS 2012

- Prepared questionnaire by WHO and CDC
- Turkey and Thailand are the only two countries repeating GATS

### HIS
- HIS 2008
- HIS 2010
- HIS 2012

- Prepared questionnaire by Eurostat
- Turkey is repeating biannually, while EU member states are repeating it once every six years
Content

GATS

Tobacco questions (MPOWER)
- Monitor tobacco use and prevention policies
- Protect people from tobacco smoke
- Offer help to quit tobacco use
- Warn about the dangers of tobacco
- Enforce bans on tobacco advertising, promotion and sponsorship
- Raise taxes on tobacco

HIS

Modules on health
- Health status
  - Health status, disease and chronic conditions, accidents and injuries, absence from work due to health problems, physical and sensory functional limitations, Personal care activities, household activities, pain, mental health
- Health care
  - Use of inpatient and day care, use of ambulatory and home care, medicine use, preventive services, unmet needs for health care
- Health determinants
  - Weight and height, physical activity and exercise, consumption of fruit and vegetables, smoking (MPOWER), alcohol consumption, social support, provision of informal care or assistance,
Methodology (GATS)

**GATS 2008**

- Sampling method: Three staged stratified cluster
  - 400 blocks (200 urban, 200 rural),
  - 28 households (14 males, 14 females) from each block = total 11200 households, 5600 urban (2800 males, 2800 females), 5600 rural (2800 males, 2800 females),
  - only one 15+ household member randomly selected
- Response rate
  - Household response rate: 93.7%
  - Individual response rate: 97.0%

**GATS 2012**

- Sampling method: Three staged stratified cluster
  - 412 blocks (206 urban, 206 rural),
  - 28 households (14 males, 14 females) from each block = total 11536 households, 5768 urban (2884 males, 2884 females), 5768 rural (2884 males, 2884 females),
  - only one 15+ household member randomly selected
- Response rate
  - Household response rate: 93.3%
  - Individual response rate: 98.9%
## Methodology (HIS)

Division of Work

- **Social Sector Statistics Department:** Design of Turkish questionnaires prepared by CDC (GATS questionnaire)/Eurostat (HIS questionnaire) beforehand, additional questions and design of them, coordination with regional offices in the process of pilot/field application, data analysis, publication of press release and book.

- **Information Technologies Department:** Preparing the data entry programme (with the help of CDC for GATS) and storage in oracle and SAS.

- **Sampling and Analysis Technique Department:** Sampling and assigning weight after the completion of field application.

*For almost all of the stages above, TurkStat tries to stick to CDC and Eurostat recommendations*
Basic indicators for GATS and HIS

*HIS results on tobacco are not shared with public for the years GATS implemented as well (2008, 2012)

*This indicator shows that we can provide the sustainability and consistency in measuring some indicators on tobacco by means of HIS conducted in every two years.
Future plans

• In September-November 2014, HIS will be repeated.
• The draft questionnaire includes almost 15 questions (4 of them are the proposal of Eurostat, others are the proposals of TQS and national partners).
• These questions help to provide some information on
  – Monitoring tobacco use and prevention policies
  – Protecting people from tobacco smoke
  – Offering help to quit tobacco use
Monitor tobacco use and prevention policies

Indicators:

- Current Tobacco Smokers
- Current Daily Tobacco Smokers
- Former Tobacco Smokers
- Smoking initiation age and its reason (not in TQS)
- Daily smoking initiation age (not in TQS)
- Type of tobacco used (not in TQS)
- Average number of cigarettes smoked per day
Protect people from tobacco smoke

Indicators:

• Exposure to secondhand smoke indoor
• Places where exposed to secondhand smoke
Offer help to quit tobacco use

Indicators:

- Smoking quit attempt
- Methods used for smoking quit
Thank you ...
