

MIGRATION DATA

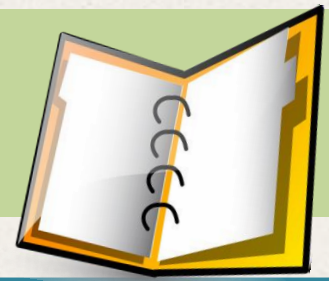

CENSUS

VS

ADMINISTRATIVE
RECORD

Internal Migration (Administrative Record)

- The data is quite different
- The coverage from administration product is vary amongs province or regency/municipality: some are fully-coverage but some are undercoverage
- Passive report: those who concern with the vital statistics will report
- Both from census/survey and admistrative record can serve the data of inter-provincial and intra-provincial migration

International Migration (Census)

- Stock vs flow
- From census: disseminated by characteristics
- Net international migration for assumption of population projection, from census vs administrative record
- Net international migration from census is smaller than administrative record
- International migration flows (inflows or outflows)

Data from census vs administrative record

- Net International Migration from Census/Survey < Administrative Record
- More detailed tabulation from Census/Survey than from Administrative Record
- More Disaggregation Data in Census/Survey than in Administrative Record
- More valid from Administrative Record than from Census/Survey
